ARISS QSL Card Report

July 2005

Rosalie White, K1STO

ARISS QSL Cards

- As of today, most ARISS regions have very few QSL cards in stock.
- At our last ARISS Meeting, we reviewed photo selections, and approved one.

ARISS QSL Cards

At the October 2004 ARISS meeting, the delegates considered a suggested text for the QSL card.

In January 2005, the delegates approved the text (via an email vote).

ARISS QSL Cards

At the October 2004 ARISS meeting, delegates were given a suggested layout for the boxes on the QSL card.

ARISS QSL Cards

In February 2005, the delegates decided on (via email) the following, for the layout of boxes on the QSL card. There is not enough space for a separate box to...

- ...record a crewmember's name, but there is room under the call signs to record the crewmember's name.
- ...record if a QSO was a school QSO or a personal QSO -- and that type of detail is not needed.
- ...record a downlink freq -- and that detail is not needed.

Delegates were to suggest what boxes to enlarge...see last slide.

ARISS QSL Cards

- European delegates can get artwork done at no cost. They think they can get prices below the cost of what we paid to print and ship our first card.
- Gaston said he could get an updated price list.
- Russia said they have good print prices, also.
- Delegates will look at pricing from both areas.

ARISS QSL

From what delegates suggested and accepted for the layout of boxes, they look as follows:

From	To	Day	Month	Year	UTC	MHz	Mode
NA1SS RS0ISS							Voice Packet SSTV APRS Repeater SWL
